

GEO. COOLING & SONS.

Seed Merchants and Nurserynpapartment of Horticultu

Seed Warehouse-11 NORTHGATE STREET, BACCHNELL UNIVERSITY,

Nurseries and Rose Grounds—BATHEASTON and SWAINSWICK, near BATACA, N. Y.

January 1st, 1912.

Customers will much oblige by giving instructions as to best means of forwarding, name of nearest Station, &c., to ensure prompt delivery.

To obviate the necessity of writing the Seed Order in detail, an Order Sheet is enclosed with this Catalogue, the quantity required of each variety having only to be marked in the column left for that purpose. Care should be taken to always fill in the Name and Address; during the season many orders reach us unsigned, and much inconvenience to customers is caused by our being unable to trace the origin of such orders.

Cheques should be crossed "Union of London and Smiths' Bank, Ltd.," and Postal Notes and Orders made payable to Geo. Cooling & Sons, Bath. May we ask as a favour that orders for very trifling amounts be accompanied by the remittance, the trouble and expense of booking these small sums being great.

We allow a Discount of 5 per cent. off amounts above £1 paid within 14 days' date of Invoice. All Accounts are due without deduction at Midsunmer and Christmas. A remittance or reference is respectfully requested from those sending their orders for the first time.

RETURNED EMPTIES.—We charge cost price for Hampers, Bags, &c., but are always willing to allow the full amount charged if they are returned to us in good condition within a month. The name of the sender should always be written upon the address label, and we should be advised by post of their dispatch.

Address for Telegrams-" COOLING, BATH." National Telephone-No. 10.

Our NURSERY CATALOGUE, containing Descriptive List of Roses, Fruit Trees, Evergreens, Shrubs, Hardy Climbers, &c., will be forwarded Post Free on application.

COOLING & SONS' "Somersetshire" Collections

OF CHOICE VEGETABLE SEEDS

FOR ONE YEAR'S SUPPLY.

The following liberal Collections are carefully arranged to produce a succession of Vegetables throughout the year. They are especially suited to those who, not keeping a professional gardener, are at a loss in compiling a suitable list. Each article is given in its proper proportion, and none but well-known and prolific varieties are included. We send out a large number of these Collections to all parts every year, and they invariably give very great satisfaction.

1 Peck Seed Potatoes for Main Crop.

GARDEN PEAS.

CULTIVATION.—Peas do well in any good garden soil, but thrive best in ground deeply trenched and manured for a previous crop. Sow about an inch and a-half deep in double rows 6 or 8 inches apart. It is also a good plan to sow in trenches wide apart, with some other crop between; by this means both sides of the rows get the full advantage of light and air, while the trenches are convenient for watering in dry seasons. They should be kept clean from weeds and earthed up twice in their growth. The height to which peas will grow in a great measure depends on the richness of the soil and the wetness of the season. The large wrinkled varieties are the sweetest and most delicately flavoured, but are not so hardy as the dwarf sorts, and therefore not so well adapted for small gardens. Those growing 3 feet high should not be nearer each other than 3 or 4 feet, and have stakes or bush for support. For an early crop a sowing of the Earliest varieties may be made in November, December, and January—they are hardy, and frost will not harm them. Sowings of Second Early varieties may be made in February, and the main crops in succession from March to the end of May. Late sowings for Autumn crops may be made, according to the season, until the early part of July. Peas should be gathered as fast as they become fit for use.

Earliest Varieties.

Pint.

careful selection from Earliest of All; it is ready quite 3 or 4 days before that variety, and produces longer and better filled pods; we offer it with every confidence as the best and most prolific first early round variety with which we are acquainted ... $2\frac{1}{2}$ ft. 29 - 16

IMPROVED WHITE WINDSOR.

COOLING'S

FRENCH or KIDNEY BEANS.

COOLING'S NE PLUS ULTRA.

CULTIVATION.—The Dwarf varieties may be sown from the middle of April to the end of July in rows 2 feet apart; if dry weather sets in water copiously. The most suitable time for sowing the tall varieties is during the month of May, in rows 4 feet wide, and the seed 2 inches deep.

Dwarf Varieties. Par quart	
rei quari—s.	d.
COOLING'S "NE PLUS ULTRA." Selected stock. This	
variety has now established itself as the earliest and most	
productive Dwarf Bean in cultivation; it is unequalled	
for foreing or first sowing out of doors, being at least ten days earlier than Osborn's and other well-known early	
kinds. This fine Dwarf Bean has been awarded more	
Certificates of Merit by the Royal Horticultural Society	
after the Chiswick trials than any other variety 2	0

ASPARAGUS.

CULTIVATION.—The seed should be sown in March and April, in rows two feet apart; when one or two years old transplant into beds. In selecting a spot for an Asparagus Bed choose an open and sunny situation; as this is a crop which will occupy the same spot for several years a little trouble expended upon it in the first place will well repay itself. The soil should be trenched at least to the depth of two feet, and plenty of good rotten manure mixed with it from top to bottom. The beds may be four feet wide, with two feet alleys between; three rows should be planted in each bed, one in the centre and one on each side at the distance of a foot; the roots about nine inches apart in the rows. A dressing of salt or asparagus manure in autumn or early spring at the rate of about four pounds to every six square yards is very beneficial.

For ASPARAGUS PLANTS, see Culinary Roots, page 23.

BEET.

CULTIVATION.—Sow end of April and in May in drills a foot apart and

half-an-inch deep; thin out the plants when up to 12 inches apart. A rich deep open soil is the most suitable for Beeter COOLING'S OMEGA, this highly esteemed variety is of medium size, and remarkable for handsome shape and rich crimson colour, but more especially so for its distinct flavour, which is delicately sweet and agreeable, far surpassing any kind yet offered. This variety is the original green-leaved Beet which has now become so popular with private and market growers in all parts of ...per pkt. 6d. 1 8 the country VEITCH'S SUPERB RED, finely formed, bright rich colour, and high quality. DWARF GREEN CURLED or SCOTCH, hardy, the

best Winter Greens per pkt. 4d. 0 8

TALL GREEN CURLED, the tall Scotch Kale, pkt. 4d. 0 8

MELVILLE'S GARNISHING, invaluable for decorative

purposes and an excellent vegetable, its leaves varying in colour—purple, rose, and white, edged with green, per packet 6d.

RAGGED JACK, a very useful and hardy variety,
per packet 4d.
THOUSAND HEADED, bardy and prolific

COOLING'S HARDY MOSS CURLED KALE.

BROCCOLI

CULTIVATION.—Succeeds best in a substantial loamy soil. Frequent sowings are necessary during March, April, and May if a succession is required. The first crop should be got out as early as possible in June to get well established before very dry weather begins. Plant out in rows two feet apart.

For Late Use.

stemed, growing close to the ground, quite distinct and good per pkt. 1/-

COOLING'S BEST OF ALL, a splendid late Broccoli, ready in May, large close compact white heads, and very superior flavour, recommended per pkt. 6d. and 1/-METHVEN'S JUNE. Fine pure white heads have been cut as late as the end of June. It is very hardy, and stands the Winter well VEITCH'S MODEL, firm compact pure white heads in May and June, highly recommended, pkt. 6d.; oz. 1/6 LATE QUEEN, a very excellent late variety, which produces good heads in May and June. It is quite distinct, of dwarf and compact growth, and is very hardy per pkt. 6d.; per oz. 1/6 per pkt. 6d.; per oz. 1/6 LEDSHAM'S LATEST OF ALL, very late, highly recommended 6d.; 1/6 WILCOVE'S LATE WHITE, a well-known and excellent medium late variety 4d.; 8d.

COOLING'S PERFECTION.

BRUSSELS SPROUTS.

CULTIVATION.—This much esteemed vegetable requires a long season to complete its growth. Sow in February or early in March for first, and April for successive crops; have the seedlings planted out before Midsummer. In October the plants should have additional earth drawn to the roots to support them and prevent their being injured by frost. We are particularly noted for our Brussels Sprout Seed; it always gives the greatest satisfaction.

CAULIFLOWER.

CULTIVATION.—Succeeds best in a rich and warm situation. For first crop sow in August, prick out into beds, and protect during frost. Sow for succession from February till June for Summer and Autumn use.

Per pkt.—s. J.

COOLING'S NE PLUS ULTRA, a	n autumn cauli	flower of great	merit. It is	from two to tl	ree weeks	
earlier than Veitch's Giant, and						1
highly recommended						1 1
COOLING'S LEVIATHAN, a gran	d late cauliflox	ver coming in	immediately	after Veitch'	s Autumn	

CABBAGE.

CULTIVATION.—To grow good full-headed Cabbage the ground must be richly manured, deeply dug, and thoroughly worked. Sow in rich finely-raked soil which has had a good soaking of water the day before. As soon as the seedlings are well up thin out or prick them off in another bed 6 inches apart. When planted out they should stand about 30 inches asunder. Hoe every week, stirring the ground deeper, and drawing the earth up to the plants when they begin to head. A supply of Cabbage may be had all the year round by successive sowings. The first sowing should be made about the middle of March—this will give the late autumn and winter supply. Further sowings may be made at intervals on to end of July or beginning of August, which will come in for spring and summer use. The Red Pickling should be sown in August.

RED DUTCH ...

COOLING'S PRIDE OF THE MARKET, a desirable variety, which we offer with every confidence; it has been carcfully selected for many years, and, as proved in our trial grounds, is the earliest in cultivation; it is of medium size, short stemmed, and produces compact heads of delicious marrow flavour ...

WHEELER'S IMPERIAL, TRUE WAR-MINSTER VARIETY, one of the carliest and most useful of spring Cabbage; of moderate size, produces firm heads, and has the peculiar character of heading in very rapidly $1 ext{ } 0$

all the Year Round. It is of medium size, deep green and of compact habit, somewhat conical in shape with few outside leaves, and very rapid in growth. May be sown successionally for crops throughout the Spring, Summer and Autuum

per packet 1/-

COUVE TRONCHUDA, or BRAGANZA CABBAGE, a most delicious vegetable which should be grown in every garden; the ribs of the leaves are white and solid, and may be stripped and served as Sea-kale ...

CHERVIL.

CULTIVATION.—Sow in succession from March to July. The young leaves are much esteemed; they impart a warm aromatic flavour to soups and stews, and are also in demand for the piquancy they impart in mixed salads.

FINE CURLED, per oz. 6d.

CHICORY.

CULTIVATION.—Sow in May or June in rich soil, and afterwards thin out to 6 inches apart. The roots should be lifted in the Autumn and treated as Sea Kale.

COMMON, for blanching and for salads, per oz. 6d. WITLOEF (Brussels Chicory), one of the finest Winter Salads, and equally good boiled pkt. 6d.

COOLING'S WHITE DEFIANCE.

CELERY.

CULTIVATION.—Succeeds best in a highly enriched soil having abundance of moisture. For earliest crop sow on a hot bed in February, and for main crops in March and April. Prick out the earliest sowings when about two inches high, and transfer to the trenches in June. The latter sowings should be pricked into rich soil, and allowed to stand until they are four or five inches high The trenches should be twelve to eighteen inches deep, at the bottom of which a heavy dressing of manure should be dug in. Earth up gradually as the plants grow, and water every week should the weather be dry.

CORN SALAD or LAMB'S LETTUCE.

CULTIVATION.—Sow in April for Autumn use and in August for Spring use. This is the most economical of all small salads, and may be used as a substitute for Lettuce in winter.—Per packet 3d. and 6d.

DANDELION.

CULTIVATION.—Sow in March and April where the plants are to stand, in rows 12 to 15 inches apart. The quality is much improved by blanching, which may be done by placing inverted flower pots over the plants.

IMPROVED THICK-LEAVED or CABBAGING, excellent for salads, per pkt. 6d.

EGG PLANT.

CULTIVATION.—Sow in hot-bed in March, and when 3 ins. high put the plants singly into small flower pots and place in a frame till all cold weather is past, when they may be taken from the pots without disturbing the roots and planted in a sheltered place 2 feet apart. Draw the earth up to their stems when about a foot high.

PURPLE, SCARLET, WHITE, and MIXED. Each per pkt. 3d. & 6d.

CUCUMBERS.

CULTIVATION.—Sow the Frame Varieties from January until March for succession; care should be taken to keep up a uniform heat, both bottom and atmospheric, which should range from 70 to 80 degrees. When the plants are in bearing an occasional watering of liquid manure will assist in swelling out and forwarding the fruit; care must also be taken that the plants are stopped and trained regularly, and not be allowed to make too much wood.

Sow the Ridge Varieties in April, and plant towards the end of May in good rich ground.

COOLING'S IMPROVED TELEGRAPH CUCUMBER GROWING FOR SEED. (From a Photograph).

Per packet-s. d. COOLING'S IM-PROVED TELE-GRAPH, the best flavoured and heaviest cropping Cucumber in cultivation; we have carefully selected it for many years, and have succeeded in producing a model variety. Visitors to our Nurscries during the Summer season are astonished at the immense crop and perfect specimens in the houses, growing for seed; the illustration shown is from photograph of one of our houses, 60 feet long,

RAMPION.

CULTIVATION. - Sow in drills about six inches apart on rich soil during April and May; thin out to four inches apart.

Per packet 3d. and 6d.

SALSAFY and SCORZONERA.

CULTIVATION.—Sow in April and May in drills fifteen inches apart; take up the roots in November. The Salsafy has a grassy top and a long white tapering root nearly resembling a small When properly cooked it is very wholesome and nutritious, with the flavour of an oyster. Scorzoncra is very similar to Salsafy, and is also known as Black Salsafy or Black Oyster Plant.

SALSAFY, oz. 10d. SCORZONERA, oz. 1s.

SALSAFY-MAMMOTH SANDWICH ISLAND .--A distinct variety, producing straight clean roots twice the size of the old sort ... per oz. 1s. 6d.

RHUBARB.

CULTIVATION. - Sow on a slight hot-bed, and transplant out in rows in May or June.

FINEST MIXED VARIETIES ... per packet 6d. For ROOTS, see page 23.

SEAKALE (Seed).

CULTIVATION. - The soil for Seakale must be well trenched and manured. If grown from seed, sow in March and April in drills three feet apart and an inch deep. If roots are planted (which is much preferable) single plants should be placed nine inches apart, in rows three feet from cach other. Scakale is easily forced in a warm cellar by putting some of the strongest roots in boxes or pots of soil and covering with litter.

LILY WHITE, considered to be far superior to the old variety, and more delicate in colour ... per oz. 1s. ORDINARY VARIETY

For ROOTS, see page 23.

SPINACH.

CULTIVATION.—For an early summer crop sow Round-Seeded early in February in drills one foot apart, and thin out to two inches in the row. The Priekly kind is generally sown in August for winter and early spring use. The Orach varieties may be sown at any time in the spring, and will prove valuable in the event of a drought or hot weather.

Round Seeded or Summer.

FROGMORE SELECTED TOMATO.

TOMATO.

CULTIVATION.—The Tomato is rapidly growing in general estimation, and will probably soon be considered one of the most important of all garden vegetables, as it can be prepared in so many ways for family use throughout the whole year. Sow as required from January to March, and when the plants are ahout 2 inches high transplant into small pots—one plant to each pot—and set the pots into the hot-bed, by which process the plants are rendered more sturdy and branching. Transfer to the open ground as soon as all danger of frost is over, in hills four fect apart each way, having previously mixed a shovelful of well-rotted manure with the soil. Water freely at time of transplanting, and shelter from the sun for a few days until the plants are established. To hasten the maturity of the first fruits which sets, pinch off the tops and all the secondary shoots which afterwards appear above the flowers. Soil should be rich and light on a dry sub-soil.

Per packet—s. d

wards appear above the flowers. Soil should be rich and light on a dry sub-soil. Per packet—s. d	
produced in large clusters and of very fine flavour)

GOLDEN JUBILEE, Veitch's. Raised at the Royal Gardens, Windsor, by Mr Owen Thomas; of beautiful clear golden colour relieved by a suffusion of scarlet; of delicions flavour 1 0	,
HAM GREEN FAVOURITE, large handsome fruit, heavy cropper, excellent flavour, highly recommended	,
HIPPER 1. (Holmes), new, deep crimson colour, perfect in shape, of good flavour, and remarkable for the large clusters of fruit it produces	,
HOLMES' SUPREME, a variety of sturdy growth and exceptionally compact habit, very free in setting. After trial at Chiswick the R.H.S. awarded this variety the highest number of marks, 6d. & 1 0)
MAY'S FAVOURITE, a very early and free setting variety which we can highly recommend. It produces large smooth handsome fruit in immense clusters, rich scarlet crimson, of firm texture; flavour is all that can be desired	j
MONEYMAKER, evenly formed perfectly globular fruit of bright scarlet colour and thin skin, solid flesh and fine flavour, of robust constitution	,
PERFECTION, very large fruit and heavy cropper 6d. and 1 0)
SUNRISE, an early heavy cropping vobust variety of bright scarlet colour, equally valuable for inside or outside cultivation)

TOMATO— continued. Per packet-	_s	d.
VICTOR (Dickson, Brown, & Tait), fruit of medium size, rich colour, and very superior in flavour, described as one of the best varieties yet introduced		0
WINTER BEAUTY (Sutton), fruit of good size, fairly smooth, deep in colour, heavy cropper and strong constitution, valuable for winter fruiting	1	0
RED CASCADE, a very ornamental variety for decoration, with long racemes of Currant-like fruit of finest quality	1	0
YELLOW CHERRY, a companion to above, with abundance of Cherry-like fruit in clusters, of bright yellow colour	1	0
THE NEW OUT-DOOR TOMATO—EARLY PROLIFIG. Small plants put out in the open field in the end of May have produced heavy crops of medium-sized smooth round fruit of good colour by the beginning of August. The best of many hundreds of seedlings raised from a cross between Challenger and Open Air	1	0

SELECTED MUSHROOM SPAWN.

Our Improved Spawn produces large crops of thick fleshy Mushrooms.

CULTIVATION.—In making a Mushroom bed so much fresh horse-manure as will be required to make the bed 12 to 18 inches deep should be thrown into a heap to ferment; turn and mix it well together every three or four days. After it has been turned several times, say for a fortnight or three weeks, it will be fit to make the bed. Beat the manure well down to the depth mentioned above, and allow it to remain a day or two until sufficiently cooled for spawning. When the temperature of the bed is about 65° break the spawn into pieces about the thickness of a walnut, and place it into the bed 2 inches deep and 9 inches apart; cover with 2 inches of good soil, and again beat down. The Mushrooms should appear in about 5 or 6 weeks after spawning. Should the bed get very dry (but on no account otherwise) a slight watering with tepid water is beneficial; when the Mushrooms begin to appear tepid water may be given more frequently. Much disappointment often occurs in growing Mushrooms. To prevent this as much as possible, we have made arrangements for a supply of spawn from one of the best makers in the country; we can especially recommend it as being of the finest quality procurable, and feel convinced that when once tried no other make will afterwards be used.

Fresh English-made Spawn 4d. per brick.; bush. 5s. Trial Packet of 3 Bricks free by Parcel Post for 1s. 6d.

FRENCH MUSHROOM SPAWN.—This imported Spawn is gaining favour on account of the excellence of the Mushrooms it produces and its invariable good quality. Many amateurs who fail with the ordinary Spawn succeed with this.—Per box 3/.

VEGETABLE MARROW and GOURDS.

CULTIVATION.—Sow in heat in April, plant out towards the end of May in rich light soil; protect the young plants until they	
start into growth, and water copiously in dry weather. Per packet—s. d.

HERBS.

CULTIVATION.—A few Pot Herbs should have a place in every vegetable garden. Every cook and every good housekeeper knows the value of the little patch on which she makes daily raids in the summer, and which furnishes such a nice collection of dried herbs for winter seasoning. A very small space will grow all the herbs needed in any family. Their culture is very simple, and the best way is to make a little seed-bed in the early spring, and set the plants out as soon as large enough in a bed. Care must be taken to harvest them properly: this should be done on a dry day, just as they come into full blossom. Tie them up in small bunches and hang in the shade to dry, and then wrap up in paper and stow in some air-tight vessel, or rub the leaves to a powder and pack in bottles and cork tightly; they will keep for any length of time.

SEED POTATOES.

Our Potatoes are grown specially for seed; all the most important varieties in the best districts of Scotland and Lincolnshire; they are very carefully selected, and may be relied upon as true to name and perfectly free from disease. Although we cannot compete with the prices asked for the ordinary market samples, which are sold for eating purposes, and which are too often bought and sent out in a mixed state for planting, yet we believe our

prices will compare very favourably with those of other seedsmen who make Potatoes a speciality.

First Early Varieties.

satisfaction (sutton's), a thick pebble-shaped Potato with very shallow eyes, an enormous cropper, and valuable main crop	2	6	8 (6	main crop Potato, which may be highly recommended. The tubers are pebble shape, and of superior quality	2	6	8	6

We shall be pleased to procure and supply, at the advertised price, any variety of POTATO required which we do not Catalogue.

COOLING & SONS' LAWN GRASS SEEDS

As supplied to the Royal Parks.

RASS SEEDS can never be sown too thickly, as it is found that the thicker the seed is sown the finer will be the turf. March and April are the best months for sowing, and the quantity of seed usually sown is 80 lbs. to 100 lbs. per acre. If the ground is to be clothed thickly the larger quantity is recommended. The land should be rolled before and after sowing the seed. As many kinds of small birds are very fond of Grass Seeds, it may be well to give some protection for a short time till the plants are up. Carefully remove all weeds as soon as they make their appearance, and when the grass has grown a few inches high it should be mown with a scythe, and cut afterwards every ten days till October. A mowing machine should not be used the first season. Frequent Mowing and Rolling are necessary to keep the turf in good order, as a thick bottom grass cannot be procured and maintained without compression by frequent rolling.

To improve Old Lawns that are thin, about 20 lbs. per acre of Lawn Seed may be sown, raked in with a fine tooth-rake, and well rolled.

COOLING'S "PHŒNIX" LAWN GRASS.

The Finest Mixture of Dwarf-growing Evergreen Grasses procurable; the best for Garden Lawns and all positions where a dense velvety turf is desired.

Per lb. 1/6; 14 lbs. 20/; 28 lbs. 38/; 112 lbs. 145/.

A Sample Packet Post Free for 1/.

COOLING'S LAWN TENNIS MIXTURE.

Per lb. 2/; 7 lbs. 13/.

COOLING'S SPECIAL MIXTURE OF SUITABLE GRASSES AND CLOVERS FOR IMPROVING AND RENOVATING OLD PASTURES AND MEADOWS.

Per lb. 10d.; per cwt. 84/.

COOLING & SONS' "PHŒNIX" LAWN MANURE.

This is a specially prepared Manure which should be applied during Spring and early Summer, when it will materially and quickly improve the turf. It is composed only of the most suitable ingredients to encourage the growth of the finer grasses, and will produce a close thick sward of a rich dark green colour. It should be applied in showery weather if possible, at the rate of one pound to every four square yards, or for large lawns at the rate of five cwts. per acre.

7 lbs. 1/9; 14 lbs. 3/; 28 lbs. 5/6; 56 lbs. 10/6; 112 lbs. 18/6.

Including Carriage for not less than 56 lbs.

OUR ROOT SEEDS

Have been saved from carefully selected and transplanted Bulbs. By this process less seed is harvested and a greater expense incurred, but the seed is infinitely more valuable to the purchaser, and may be relied upon for producing a greater weight per acre of well-formed roots.

MANGEL WURZEL.

COOLING'S CONQUEROR, a specially selected stock of Yellow Globe Mangel which we consider the best type of this class yet offered. It is handsome in shape, very firm in flesh, and produces an immense weight per acre,

per lb. 1/6

Golden Tankard, a yellow fleshed variety of nnequalled feeding and milk producing propertics, of medium size and beautiful shape. We can strongly recommend our selected stock of this popular variety.

> ... per lb. 1/3, Selected

Other varieties from 1s. per lb.

SWEDES.

- COOLING'S TRIUMPH, this Swede has been carefully selected and grown for many years. It combines the special properties of being the heaviest cropping, hardiest, and most nutritious variety. It grows to a good size without coarse-ness, keeps sound until very late in spring, and will succeed on all soils, often when other varieties fail; strongly recommended, bush. 45/; lb. 1/-
- COOLING'S SELECTED GREEN-TOP, at a trial of some twenty distinct varieties of Swedes this variety, with our Triumph, stood out in front of all others as the best and heaviest cropping kinds. It is most handsome in shape, uniform in growth, firm in flesh, and short in top. It is of the bronzy green type, and therefore very hardy ... per bush. 45/; per lb. 1/-

Other varieties from 25/ per bushel; 6d. per lb.

COOLING'S SPLENDID STRAIN OF TUBEROUS-ROOTED BEGONIAS.

Our Collection of Begonias, from which we save the seed we offer, and select our roots, is a very fine one, and is much admired by all visitors to our Nurseries during the flowering season throughout the Summer and Autumn. The Seed we are sending out has been saved from carefully hybridised flowers of the best varieties in cultivation, and we are convinced will give our customers every satisfaction.

COOLING'S SUPERB DOUBLE BEGONIAS.

Begonia Roots for Bedding and Pot Culture.

The popularity and adaptability of the Begonia for Bedding purposes has led to its largely increased cultivation. During the summer beds of Begonias withstand the heavy showers and weather far better than Geraniums or Verbenas, and last far longer in flower. We are offering a very beautiful collection of both single and double kinds, in separate shades of colour, at prices really less than the cost of ordinary bedding plants. We strongly recommend their more extended use for out-door culture.

- 484 A collection of 8 very fine dwarf varieties, separate, 1s. 6d.
- 485 Gold Striped, a splendid strain, 1 ft., per pkt. 6d.
- 486 Mixed, Dwarf, spotted and striped,

per packet 3d. and 6d.

487 Dwarf French Striped "Grandiflora,"
flowers are almost as large as the African, but
with the compact free-flowering habit of the
dwarf French, 15 inches ... per packet 6d.

SINGLE MARIGOLD.

- 488 **Legion of Honour,** very dwarf and compact in growth; and produces a profusion of striped yellow and brown single flowers, per pkt. 3d.
- 489 Silver King, similar to the above, with pale silvery yellow flowers, heavily blotched with maroon, 9 inches per packet 6d.

MESEMBRYANTHEMUM.

- 490 Cordifolium variegatum, fine dwarf plant for edging or bedding, with white-margined foliage, \(\frac{3}{4} \) ft. per packet 6d.
- 491 Tricolor, numerous waxy pink star-like flowers, fine for rockwork, &c, ½ ft. ... per packet 3d.

MIGNONETTE.

- Well known fragrant hardy annual. If the plants are thinned out they grow stronger, and produce longer spikes of flower; can be had the whole year by sowing at intervals. Mignonette has been much improved of late years, and the new varieties we offer are far in advance of the ordinary kinds both in size of spike and compactness of growth.
- 492 **Goliath,** a very striking novelty, said to be the largest flowered Mignonette yet introduced; it produces enormous trusses of bright red shining flowers, very double; a great advancement, and equally suitable for pot culture or out-door growth,
- per packet 6d. and 1s.

 Bismarck, is exceedingly robust and compact in growth, and produces flower spikes twice as broad at the base as those of *Machet*, of a reddish colour ... per packet 6d. and 1s.
- 494 Copper King, a beautiful new Mignonette, producing immense trusses of coppery flowers, scented; quite distinct ... per packet 6d. and 1s.
- 495 **Machet**, an exceedingly fine variety; the habit is extremely robust and dwarf, the flowers of a bright red, and beautifully scented,
- per oz. 2s.; per pkt. 6d. and 1s. 496 **Golden Machet**, a selection from the popular *Machet*; the plants are of strong compact habit, bearing long massive spikes crowded with golden yellow blossoms ... per packet 6d.
- 497 Machet, White Pearl, beautiful pure white variety of the compact growing Mignonette; free-flowering, delightfully fragrant, and most suitable for pot growth or for bedding.
- per packet 6d. and 1s. 498 Large Flowered, very fragrant,
- per lb. 6s.; oz. 6d.; pkt. 3d. 499 Crimson Giant, fine large-flowering reddish
- variety per oz. 9d.; packet 3d. 500 **Hybrid Spiral**, finest variety for the garden, with numerous spikes of large size,
- per oz. 1s.; per packet 3d. 501 **Collection** of 6 distinct varieties of Mignonette, our selection, 2s. 6d.

504 A very beautiful half-hardy climber; buds at first vivid red, changing to orange yellow, and opening creamy white per packet 6d, and 1s.

MUSK (Mimulus moschatus).

505 Universally cultivated for its delicious scent. Hardy perennial ... per packet 3d. and 6d.

MYOSOTIS (Forget-me-Not).

Charming little favourites, flowering throughout the Spring and Summer months; succeeds best in a moist shady situation. Hardy perennial.

- 506 Alpestris Victoria, a beautiful variety of dwarf bushy habit, with a profusion of large bright azure blue flowers; 5 to 7 ins. per packet 6d.
- 507 **Dissitiflora**, blooms much earlier than other species and for weeks together; flowers large and of a lovely bright blue, per packet 6d. and Is.
- 6d, and 1s. 508 — Alba, pure white . . .
- 509 Palustris, the Marsh Forget-me-Not, & foot,
- per packet 6d.
 510 Royal Blue, intense rich deep indigo blue, with long stalks, early and free flowering, packet 6d.
- 511 Star of Love, a charming and very early compact bright blue flower, only 5 inches in height; distinct and good per packet 6d.

NASTURTIUM.

For showy and constant bloom few flowers equal Nasturtiums, which have been greatly improved during the past few years both in colour and habit of growth. They will bloom in any situation, hot or cold, wet or dry, and are admirably adapted for rockwork and for covering trellises or rustic work. The Tom Thumb or Dwarf Nasturtiums are among the most popular annuals for bedding, massing, &c., owing to their compact growth, richness of colour, and profusion of blooming.

Tom Thumb or Bedding Nasturtiums.

512 Apricot, very striking variety with dark foliage, flowers of a rich apricot colour

per oz. 1s. 6d.; per packet 6d.

- 513 Aurora, very beantiful variety, primrose shaded per oz. 1s. 6d.; per packet 6d. carmine

- of great size on long stems ... per packet 6d.

COOLING & SONS' LARGE-FLOWERED PETUNIAS.

Petunias of late years have been greatly improved. The large-flowering varieties now offered are far in advance of the old strain of Petunias, and make charming pot plants for the cool conservatory, the bright and varied colours of the flowers and compact habit of the plants rendering them very suited for this purpose. The double varieties we offer have been carefully hybridised and saved under glass, and may be relied upon to produce many very beautiful double flowers.

Double Varieties.

a selected strain of double, a selected strain of double Petunias, producing immense flowers of most brilliant NOVELTY colour; splendid for pot culture, pkt. 1s. 6d. & 2s. 6d.

761 Beauty of Nice, delicate shade of fleshy pink per packet 6d. and 1s.

762 Crimson King, fiery crimson, a very effective shade ... per packet 6d. and 1s.

763 Mont Blanc, snow white ,, 6d. and 1s

761 Queen Alexandra, rosy lilac of a very charming tint per packet 6d. and 1s.

SAPONARIA.

- 765 **Calabrica** (Soapworts), compact growing hardy annuals, with masses of miniature star-shaped flowers of bright pink colour, 3 ft.
- per oz. 1s.; packet 3d. 766 alba, pure white, 3 ft. , 1s.; , 3d.
- 767 Vaccaria, graceful sprays of pale rose flowers produced in great profusion, very striking for cut flowers; a great favourite in the Parisian market, hardy annual, 2 ft., packet 3d. and 6d.

SILENE.

Compact dwarf hardy annuals. Only a few inches in height and covered with bright flowers. Valuable for rockwork and spring bedding.

- 768 Pendula compacta, pink, ½ ft.,
- 769 — white ... per oz. 1s. ; per packet 3d.
- 770 **Peach Blossom,** beautiful double variety, of a delicate pale pink colour per packet 6d.

SNAPDRAGON. See ANTIRRHINUM.

COOLINGS' CHOICE ROSE SEEDS.

We have been able to collect seed in variety from our celebrated collection of Roses, which is one of the most complete in cultivation. The *Rugosa* varieties as a rule come true from seed; from the other kinds we offer many interesting and valuable sports and varieties may be raised.

- 771 **TEA-SCENTED**, Choicest mixed, from the finest named kinds per packet 2s. 6d.
- 773 **HYBRID PERPETUAL**, Choicest Mixed, from the best named kinds ... per packet 2s. 6d.
- 774 SMALLER PACKETS ... ,, 1s. 6d.
- 775 **PENZANCE SWEET BRIARS.** Saved from all the beautiful new varieties which have become so popular per packet 1s.
- 776 RUGOSA, Mixed Red, White, and Pink pkt. 1s.
- 777 CLIMBING and PILLAR VARIETIES, from a splendid collection ... per packet 1s.

SINNINGIA.

778 **Regina Hybrida.** The Sinningia is the genus from which the Gloxinia has been developed, and in these new hybrids the flowers are considerably larger than the species and not quite so drooping. They vary in colour from light rose to pale and deep lilac—the throat being generally pure white. The plant is strikingly handsome, about 9 inches high, per packet 1s.

SMILAX.

- 779 **Medeola Asparagoides**, half-hardy perennial climber growing very freely from seed, with long graceful leafy stems, much used for table decoration. The cut branches remain fresh for a long period ... per packet 1s.
- 780 Myrtifolia, the sprays are produced with greater freedom than the above, and being of harder foliage is more lasting in the cut state,

per packet 1s. 6d.

SOLANUM.

- 781 Wetherill's Hybrids, ornamental berried plants for table decoration ... per packet 6d.
- 782 **Capsicastrum,** valuable for decorative purposes... per packet 6d.

SWEET SULTAN.

Fine showy hardy border annual, useful for cut flowers.

- 783 **Marguerita**, large pure whlte, sweet scented per packet 6d. and 1s,
- 786 **The Bride,** pure white, flowers pkt. 6d. & 1s. 787 **Honeymoon,** rich golden pkt.
- yellow) (6d. &1s. 788 **Giant Mixed** pkt. 6d.
- 789 Yellow, White, and Purple each " 36
- 790 Ordinary Mixed ,, 3d.

New and Beautiful Varieties of Sweet Peas.

Great attention has been directed to Sweet Peas of late years, and perhaps in no other hardy flowers has there been recently such marked improvement as in this popular class of Annuals. By careful trials of our own, and watching other large trials, we have been enabled to revise our list and to include only the very large flowered and most distinct varieties, and we believe we offer a most representative collection. We have again added several desirable new varieties for this season. and the best of the Novelties exhibited at the Royal Horticultural Society's and other Shows.

COLLECTIONS OF SWEET PEAS—Including many of the latest New Varieties.

791 25 Distinct and Beautiful Varieties, one Large Packet of e	ıch		7s. 6d.

CHOICE HYBRID GLADIOLUS.

For a rich and grand effect during the summer and autumn months, the many and beautiful colours of this splendid tribe of flowering bulbs form one of the most attractive features of the flower garden. They prefer a warm south border, but will grow in almost any situation in ordinary garden soil, which must be deeply dug and

almost any situation in ordinary garden soil, which must be deeply dug and slightly enriched with well-decayed manure. The bulbs should be planted from 3 to 4 inches deep, and covered with sand to the depth of an inch, over which place the soil. By planting from February until April a succession of bloom will be produced from July till October.

AMERICAN HYBRID, Groff's Silver Trophy Strain. Comprising a most wonderful range NOVELTY.

of colours from white and cream to red, scarlet, and crimson, also lilac, heliotrope, and blue shades. Enormous flowers and spikes.

Splendid Mixture, per doz. 3/-

BLUE FLOWERED.

BLUE JAY, the finest Blue-flowered Gladiolus in cultivation; flowers of a dark velvety purple-blue with white markings

each 6d.; per doz. 5/

Mixture of all shades of Blue ... ,, 6d.; ,, 4/

NANCEIANUS HYBRIDS. A superb race of Amaryllisflowered Gladioli, resembling and surpassing the beautiful *Gladiolus Childsi* in variety of colours. This race excels by a most varied range of colours and by its large well opened flowers, and are very strong growing.

Collection of 18 Bulbs in 6 beautiful large flowered varieties to name for Exhibition 8/6

Do. of 12 Bulbs in 4 do. do. ... 6/

Finest Mixed Colours ... per doz. 1/6; per 100, 10/6

CHILDSI. Beautiful varieties of Hybrid Gladiolus, worthy of extended cultivation. They outrank all other varieties in size of spike, size of bloom, and vigour and freedom of flowering, and are altogether a distinct advance.

AMERICA, a most beautiful variety, large open flowers of a most beautiful shell pink, large erect spike... each 4d.; per doz. 3/Large Flowering Bulbs, finest mixed varieties, doz. 1/6; 100, 10/6

LEMOINE'S SPOTTED HYBRIDS. The colours are very striking and diversified, and differ from the ordinary Gladiolus by having a distinct blotch on the lower petals of maroon, purple, or crimson.

Fine Mixed Colours, per doz. 1/6; per 100, 10/6.

GANDAVENSIS HYBRIDS.

Choice Named Varieties per doz. 4/ and 6/Finest Mixed Varieties, a choice mixture of all shades of colour,
will produce many beautiful and distinct kinds, doz. 1/6; 100, 10/6
WHITE LADY, it has an enormous spike of perfect shape, and
the flowers are of great substance, and absolutely pure white; and
invaluable either for wreaths or other decorations where white
flowers are in requisition ... each 1/; per doz. 10/6

BRENCHLEYENSIS. For growing in quantities there is nothing to equal this variety. Its flowers are intense vermillion scarlet, and may be called without exaggeration the most showy flower of our gardens.

Extra Large Bulbs per doz. 1/- ; per 100, 7/6 Good Flowering Bulbs ... ,, 9d.; ,, 5/-

EARLY FLOWERING. They flower from June to August, and have only to be better known to be more extensively grown and appreciated. All last a long time in water, and on this account they are invaluable for cut flowers. They are also exceedingly pretty a pot plants for the conservatory.

NANUS, Collection of 100 Bulbs in 10 choice vars. to name, 7/0, Splendid Mixed ... per doz. 6d.; per 100, 3/6

COLVILLI ALBA.

THE BRIDE, pure white ... per doz. 6d.; per 100, 3/

LILIUMS.

POT CULTURE.—As soon as the bulbs are received pot them, one in a 6-inch pot, or two or three in an 8-inch pot. Do not let the soil come within two inches of the rim of the pot. Place in a cold frame, and give water sparingly till growth appears. As the shoots increase give more liberal supplies, and when all danger of frost is past remove to a sheltered but light situation in the open air. About the beginning of July fill up the pots to within an inch of the rim with well-rotted manure. As soon as the buds are fairly developed afford the plants the protection of a glass roof or other shelter.

The varieties marked * are the	most suitable for pot culture.
*AURATUM. The Golden-rayed Lily of Japan, undoubtedly the finest of the tribe. Ivory white ground, spotted more or less with crimson, and having a band	*LANCIFOLIUM (or Speciosum). Amongst the most beautiful, useful. and easily grown of all the Lilies. Colour varying from pure white to white and crimson
of yellow or crimson running along the centre of each petal.	spots, 3 ft. — ALBUM, pure white, per doz. 5/ and 7/6; 6d. and 0 9

Rosea, petals pure white, suffused and lined with bright rose towards the edge, centre maroon with dark spots;			
	. 2	6	
Fine Mixture of above varieties per 100, 7,	/ I	0	

DOUBLE TUBEROSES.

These produce long spikes of double pure white flowers, exceedingly fragrant and invaluable for bouquets. The value of the *Excelsior Pearl* over other varieties consists in its flowers being of double the size, imbricated like a rose, and its dwarf habit, growing only from 18 to 24 inches in height. The bulbs should be potted firmly in 11ch loamy soil, and plunged in bottom heat, care being taken that the temperature does not fall below 60 degrees.

Excelsior Pearl ... per doz. 2/; per 100, 12/6.

Various Hardy Spring and Summer Flowering Plants.

ANEMONE, Japonica Alba, hardy Autumn flowering	HEUCHERA Sanguinea, light eoral scarlet, exquisite for cut-
Rosea, elear rose, fine showy variety ,, 3s.	ting, one of our best hardy green plants each 6d.; doz. 5s.
